EDUCATION

Computer Programming and Analysis (Co-op)

Niagara College

Welland, ON

Sept. 2023 – Dec. 2025

SKILLS

Backend: Node.js, Express, .NET MVC, .NET API, Java, C#, Python

Frontend: React, Next.js, Razor, HTML, CSS, Tailwind CSS, Bootstrap, shadcn/ui

Databases: SQL Server, MySQL, SQLite, MongoDB

Cloud & DevOps: Azure, GitHub Actions, CI/CD Pipelines, Docker

EXPERIENCE

Software Developer

Escape From the 6

May 2026 – Present

Mississauga, ON

- Develop and maintain websites, internal tools, and software features supporting escape room operations, arcade games, and interactive puzzle systems.
- Build and improve web-based systems using modern frontend and backend technologies for business, marketing, and operational workflows.
- Work on arcade game and puzzle-related software, including hardware-connected workflows, game logic updates, troubleshooting, and system improvements.

Software Developer

Aerosports Parks

Apr. 2025 – May 2026

St. Catharines, ON

- Developed and maintained **full-stack applications using Next.js, React, Node.js, and SQL Server** powering dashboards and operational tools across **23 arcade game rooms at 2 facilities**.
- Built and refactored REST APIs supporting **1,500–3,000 daily plays**, high-frequency score submissions, wristband scans, player registrations, and multi-location workflows.
- Designed SQL Server schemas, optimized queries, and improved backend reliability for player management, attendance tracking, score history, and arcade operations.
- Built C# utilities, hardware control UIs, and real-time monitoring dashboards used by operations to diagnose devices, support game rooms, and reduce manual overhead.

PROJECTS

IoT-Integrated Arcade Management Platform | *Node.js, React, Express, SQL Server*

2025

- Implemented full-stack features across an internal **arcade management web app**, supporting multi-location dashboards, player management, and score tracking.
- Built backend API endpoints powering hardware automation workflows consumed by **Next.js admin UIs** and internal monitoring dashboards.
- Integrated IoT devices, smart plugs, lighting controllers, and game hardware with **real-time web control interfaces** used by staff.

Scheduling Management & Attendance Web App | *.NET MVC, .NET API, Azure, SQLite*

2025

- Built a **full-stack volunteer scheduling platform** including dashboards, role-based authentication, and REST endpoints powering the UI.
- Developed frontend pages using **Razor and Bootstrap**, backed by secure JWT and cookie authentication pipelines.
- **Won Niagara College's Community Sponsored Project competition** — presented live to investor judges, iterated on UI and workflows based on feedback, and delivered a production-ready platform.
